

LICENSED ELECTRONIC PRODUCTS

APPENDIX B.7. ARTICLE SELECT TOKENS

Customer: SOTEVirtualikirjasto Oy

The Customer's Authorized Users may access articles in unsubscribed journals, including backfile volumes, chapters in online books, articles in major reference works, by utilizing Tokens available from Wiley's Article Select service. Some products are excluded from the service.

1. **Access:** A Token provides access to a single article/chapter/unit on the Wiley Online Library platform, which may be revisited by any Authorized User for up to 24 hours.
 - 1.1. Content accessed by Tokens is governed by the terms of use specified in this Agreement.
 - 1.2. Certain products are not available for Article Select Token Use. The list of products is available at <https://onlinelibrary.wiley.com/library-info/products/articleselectunavailable>.
 - 1.3. Tokens are good from September 2, 2024 through September 1, 2025.
2. **Price:** The Customer will purchase **6,200.00** Tokens at **USD 12.00** each for a total of **USD 74,400.00** for the Term of the Agreement.
 - 2.1. Additional Tokens may be purchased at any time on a prepaid, deposit account basis, with a minimum purchase of 100 Tokens. The price is discounted based on the number of Tokens purchased. Pricing is subject to change.
3. **Customer's Access Control Options:**
 - 3.1. For all options usage is reported by journal and article at the institutional level.

	Access Control Option 1: Immediate Access Any Authorized User from your institution can access Wiley Online Library to spend/use Article Select Tokens from your licensed account. Authorized Users will download articles using tokens the institution has purchased; they simply click on the article they are interested in, and it uses a token. There are no 'pop-ups' to inform they are spending tokens
	Access Control Option 2: User Confirmation Any Authorized User from your institution must confirm they want to use the token, in order to spend/use the Tokens in the Customer's account. A confirmation message will appear on the page. The Authorized User will then have the option to download an article using a token. They can do so by clicking "Confirm."
	Access Control Option 3: SuperUser Control Customer chooses a small group of Authorized Users to be SuperUsers (i.e., selected library colleagues or departments within Customer's organization). They will become the only Authorized Users who can spend Article Select Tokens. All other users must request access by getting in contact with a SuperUser. Only SuperUsers on this list can activate an Article Select Token for a non-subscribed article. Each individual Customer adds to the list must have a User ID and Password for Wiley Online Library. Once a Token has been spent/used all Authorized Users at Customer's institution will have access to the article. When a SuperUser requests the full text of an article from a non-subscribed journal, a message will appear, prompting users to sign in. If Customer has chosen this policy, Customer may add or remove Super Users at any time. Just click the Permissions tab and follow the instructions.

4. **Agreement Term:** September 2, 2024 through September 1, 2025.
 - 4.1. During this Term, the Customer may license additional products under this Appendix and the Agreement.
5. By completing and signing these appendices, you accept the Wiley Online Library Agreement (the "Agreement") at <http://wileyonlinelibrary.com/pdf/agreement-corporate> and agree to the Terms and Conditions of Use therein.
